Populations
Measures and statistics
Research request and permitted inputs
Population, variables and intended analyses
Optional observations or summaries
Evaluation reference
Real sample or published model
1. Qualify evidence
Units / adjustment
Applicability
2. Agent models
Law + parameters
Assumptions
3. Execute
Sample from law
Inspect statistics
4. Deliver data
Virtual table
Evidence record
5. Scientific use
Run analyses
Assess utility
optional
Evidence status
Reported / derived / assumed
Agent reviews
Retain or revise
Observed scientific operation
Separately adjusted study projections converted into joint-model parameters
